15. Adjourn

WORKSESSION AGENDA

FOLLOWING REGULAR COUNCIL MEETING

1. Osawatomie Pound Trap Neuter Return Program (TNR) discussion

*NEXT REGULAR MEETING – February 13, 2020*

Osawatomie, Kansas. **January 9, 2020.** The Council Meeting was held at Memorial Hall. Mayor L. Mark Govea called the meeting to order at 6:30 p.m. Council members present were LaDuex, Dickinson, Macek, Diehm, Hampson, Walmann, Caldwell and Wright. City Staff present at the meeting were: Interim City Manager Mike Smith, City Attorney Richard Wetzler, Building Official Ed Beaudry, Assistant to the City Samantha Moon, City Clerk Tammy Seamands, Police Chief Dave Stuteville, Public Safety Officer Nina Coleman, Public Safety Officer Kevin Carpenter, Public Safety Officer John Mann, and Public Safety Officer Jaimie Skeen. Members of the public were: Roy Seichepine, Teresa Seichepine, Linda Madean, Jennnifer Dulski, Kelly Wurtu, John Wastlund, Lori Beam, Robert Suppenbach and Michelle Chester.

**INVOCATION.** John Wastlund, Osawatomie Wesleyan Church

**CONSENT AGENDA.** Approval of the January 9th Agenda; December 12<sup>th</sup> Council Minutes, Pay Application – JEO Consulting Group –Electric Generation Project - \$312.50, Pay Application – JEO Consulting Group – Electric Generation Project - \$74,796.62, Pay Application – Contech – Trail Construction - \$3,000.00, Pay Application – Hall’s Bobcat Service – Trail Construction - \$10,763.05. **Motion** made by LaDuex, seconded by Dickinson to Approve the Consent Agenda without the Pay Application – Hall’s Bobcat Service – Trail Construction - \$10,763.05. Yeas: All. **Motion** made by LaDuex, seconded by Dickinson to Approve Pay Application – Hall’s Bobcat Service – Trail Construction - \$10,763.05 as presented. Yeas: All. Hampson abstained due to conflict of interest.

#### **COMMENTS FROM THE PUBLIC.**

Roy Seichepine would like an update on “10 acres”. It has been over three months and nothing has changed with this property. The property has grass grown up around the trees and mice. Seichepine expects to see some action taken with this property. If the City does not take action, Seichepine said his attorney would.

John Wastlund does the scheduling for the invocation. Osawatomie Wesleyan Church will be starting a grief comfort group that will meet next Thursday at 7:00 p.m. Wastlund is also involved with the Ministerial Alliance. If anyone would like to offer any feedback for the community of churches working together to do something for the community, you can contact Wastlund.

Jennifer Dulski with Always & Furever passed out information regarding the Trap-Neuter-Release program and requested to be added to the agenda. Smith suggested that council meet in a work session to discuss this.

#### **PRESENTATIONS & PROCLAMATIONS.**

Oath of Office –Assistant to the City Manager – Samantha Moon was given the oath of office by City Clerk Tammy Seamands.

Oath of Office – Public Safety Officer – Jaimie Skeen was given the oath of office by City Clerk Tammy Seamands.

**PUBLIC HEARINGS.** - None.

**UNFINISHED BUSINESS.** – None.

**NEW BUSINESS.** – None.

**COUNCIL REPORTS.**

Cathy Caldwell ~ has been talking with Mayor Govea about starting a committee on people helping people or neighbor helping neighbor. They would like to do a preliminary meeting soon. They welcome those that would like to participate in this to contact either Caldwell or Govea.

Jeff Walmann ~ The trail taskforce was formed in October 2018 to complete the one mile stretch between the Karl E. Cole Sports Complex and the Flint Hills Nature Trail. They have just about completed this project. Phase II of the project will be planning for the trailhead and a bridge in the future. The trail will be useable without the bridge.

Karen LaDuex ~ reminded everyone to buy their tickets for the library fundraiser.

Nick Hampson ~ Trail Update – 3000 feet out of 4400 feet has been graveled. There is a couple more days of dirt work and then they will get some more gravel in there.

**MAYOR'S REPORT** – passed out a press release from the governor about healthcare costs. Leaps is putting out information about the ad for the City Manager position. The ranking process will take place in February. Local Government Day is January 22<sup>nd</sup>. Govea does encourage people to attend. There is also a Mayors Association Lunch that day and then a reception that evening.

**CITY MANAGER & STAFF REPORTS.**

Mike Smith ~ Elected Officials will be sworn in at the next council meeting.

Mike Smith ~ Waste Management Franchise Fee ~ A letter was sent to Waste Management to initiate the collection of the franchise fee that was included in our contract. The contract states that written notice must be given 120 days prior to imitation of the franchise fee. After receiving the notice, Waste Management would like to have a meeting in regards to billing and the franchise fee.

Mike Smith ~ Pizza hut is officially closed. The area where Pizza Hut was located holds a great opportunity for growth.

Tammy Seamands ~ The 2020 Census will be here soon. City Hall has received two grants from the League of Kansas Municipalities. One for \$150 for social media and one for \$500 for printed materials to promote the census. We are going to order rulers that say Osawatomie Counts

2020 Census to pass out to help promote the census. There will be a computer in the utilities lobby and one at the library for citizens to use to complete the census.

Richard Wetzler ~ will work on finishing the two deeds for the trail.

Ed Beaudry ~ presented the Building Codes and Nuisance Codes Annual Report. The City owns three buildable lots that staff would like to promote to sell. Those lots are 308 Reed, 100 Walnut and 810 Third Street.

**EXECUTIVE SESSION.** None

**OTHER DISCUSSION/MOTIONS.**

**Motion** made by LaDuex, seconded by Dickinson to adjourn. Yeas: All. Mayor declared the meeting adjourned at 7:11 p.m.

/s/ Tammy Seamands  
Tammy Seamands, City Clerk

## STAFF AGENDA MEMORANDUM

**AGENDA ITEM:** Election of Officers

**ISSUE SUMMARY:** After the seating of new members, following an election, the City Council re-elects officers for the City Council.

Section 1-206 of the Osawatomie Code reads as follows:

**PRESIDENT OF THE COUNCIL.** The city council shall elect one of its own body as president of the council. The president of the council shall preside at all meetings of the council in the absence of the mayor. In the absence of both the mayor and the president of the council, the council shall elect one of its members as "acting president of the council." The president and acting president, when occupying the place of mayor, shall have the same privileges as other council members but shall exercise no veto. (K.S.A. 14-208, 14-308, 12-2003; Ord. 3266, Sec. 6; Code 2008)"

Historically, the City Council has taken the additional step of electing a Vice-President of the Council to fill the role of the "acting president" as defined in the ordinance.

**COUNCIL ACTION NEEDED:** Elect officers of the City Council.

**STAFF RECOMMENDATION TO COUNCIL:** Although no specific procedure exists for the election of officers in the City Code or the Code of Procedure, it is recommended the City Council continue to follow its historic procedure for electing officers.

1. The Mayor opens the floor to nominations for President of the Council. Nominations require a second, just as any other motion.
2. After receiving one or more nominations, a motion is in order from the Council to close the nomination. Upon a second and affirmative vote, the nominations are closed.
3. If there is only one nomination, a motion to approve the lone candidate is in order.
4. If there is more than one candidate, a motion is in order to vote on the candidates to be elected to the position. Once approved, the Mayor will declare a vote in order and will call for a vote on the candidates. Each candidate's name will be called and votes will be cast by a show of hands

or a roll call. The Mayor will only vote in the case of a tie. Should there be more than two candidates and no candidate receiving a majority of the members present, the candidate with the fewest votes will be dropped (or a candidate may withdraw) and a motion will be considered to vote on the remaining candidates. This is repeated until there are two candidates.

5. Once the officer is elected, the member will take over those duties immediately. In this case, the new President of the Council will preside over the rest of the meeting in absence of the Mayor and former President of the Council.

If the Council desires to elect a Vice-President of the Council, the same above procedures should be followed for this matter as well.

## STAFF AGENDA MEMORANDUM

**DATE OF MEETING:** January 23, 2020

**AGENDA ITEM:** Osawatomie Pound Trap-Neuter-Return Program

**PRESENTER:** Mike Smith; Always & Furever Animal Sanctuary

**ISSUE SUMMARY:** Always & Furever Animal Sanctuary, under agreement with the City of Osawatomie to maintain the municipal pound, has requested the City adopt an ordinance allowing a Trap-Neuter-Return (TNR) program to control feral cat overpopulation in Osawatomie.

Attached you'll find a packet provided by Always & Furever Animal Sanctuary that further explores feral cat colony reproduction rates, statistics regarding TNR programs, and comparisons to current ordinance data.

Included is a Memorandum of Understanding for the Council to consider.

**COUNCIL ACTION NEEDED:** Review and discuss. Provide direction to staff.

**STAFF RECOMMENDATION TO COUNCIL:** Review the information and provide any feedback to staff.

## MEMORANDUM OF UNDERSTANDING

**THIS MEMORANDUM OF UNDERSTANDING (“MOU”)** is made and entered into effective \_\_\_\_\_, 2020, by and between the City of Osawatomie, Kansas, a municipal corporation under the laws of the State of Kansas, (hereinafter referred to as the “City”) and the Always & Furever Animal Sanctuary, a local agency that operates and maintains an animal care facility (hereinafter referred to as “Always & Furever”). The City and Always & Furever may, from time to time herein, be collectively referred to as “the parties.”

**WHEREAS**, on \_\_\_\_\_, 2020, the Governing Body of the City of Osawatomie, Kansas entered into an MOU pertaining to the regulation of animals, which excludes community—or feral—cats from the City Code provisions regarding running at large and ownership;

**WHEREAS**, a community cat is unsocialized to humans and has a temperament of extreme fear or resistance to contact with humans and has a straight line cutting of the tip of the ear to indicate it has been sterilized;

**WHEREAS**, trap-neuter-release (TNR) is a program that seeks to address community cats that roam around the city. The goal of the program is to trap a colony of cats, spay/neuter and vaccinate them, and return them to where they were collected. It is believed that over time this will reduce the number of feral cats; and

**WHEREAS**, MOU indirectly allows for a TNR program within the city, and shall take effect \_\_\_\_\_, 2020. The parties acknowledge a need for a mutual understanding regarding the duties of each once the MOU’s provision regarding community cats takes effect.

**NOW, THEREFORE**, in consideration of the mutual covenants and agreements herein contained, the parties agree as follows:

### 1. Responsibilities of Always & Furever.

- a. No later than \_\_\_\_\_, 2020, Always & Furever will design brochures, door hangers, and other materials providing sufficient information regarding the provisions of MOU that relate to community cats, as well information on programs and resources that interested parties may benefit from.
- b. Such educational materials will be updated by Always & Furever periodically and as needed.

- c. Educational materials developed and designed by Always & Furever shall be forwarded electronically to City within a reasonable timeframe upon their completion.
- d. Always & Furever will keep educational materials at its location and is authorized to distribute such materials to the community.
- e. If a community cat(s) is disrupting a neighborhood within the city, as evidenced by call volume for a particular cat(s) or individuals providing specific information about the alleged disruption, Always & Furever will lend traps to residents to get the cat(s). The City is not responsible for any TNR trapping, vaccinations, surgery-related, or returning expenses.

## **2. Responsibilities of City.**

- a. Educational materials provided by Always & Furever will be printed by City in a format determined by the City. The costs of printing shall be reasonable and subject to approval by the City.
- b. The City's Designated Staff shall act as the primary distributor of such materials to complainants, appropriate neighborhood contacts, and any other person or entity the City deems appropriate.
- c. When the City's Designated Staff encounters a community cat that is not ear-tipped, whether encountered in the field or by complaint, the Designated Staff Member will attempt to locate the food source or, if known, resident who is feeding the cat(s). If the food source is a resident, Designated Staff will attempt to make contact. Designated Staff Members will utilize their training and experience to confirm that the cat(s) are indeed community cats.
- d. Residents feeding, acting as caretakers for, or harboring confirmed community cats that are not vaccinated, altered, and ear-tipped may be given a Notice to Correct the violation (e.g. over the limit, unvaccinated, nuisance, at-large) and shall be provided with a brochure that contains a list of nonprofit organizations that offer low cost TNR services.
- e. The City and its Designated Staff will endeavor to send Always & Furever details surrounding complaints or general reports of community cats that are responded to in the field. Details will include field contact or complainant name and contact information, address or cross street

location of the cat(s), and specific complaint regarding the cat(s). Always & Furever will use its best efforts to resolve the complaint but is not obligated to resolve it or impound the cat(s).

3. **Training.** The parties agree to collaborate to provide education and training opportunities of interest to the parties. Specific education and training opportunities will be separately agreed to by the parties, and may include the following:
  - a. The parties agree to share information about education and training opportunities that may be of interest to the other party and to share information from training sessions of mutual interest.
  - b. Always & Furever agrees to provide training to Designated Staff Members regarding the identification and capture of community cats no later than \_\_\_\_\_, 2020, and any other pertinent information mutually agreeable to by the parties as being valuable.
4. **Quarterly Meetings.** The parties agree to meet quarterly at agreed upon times, or as otherwise agreed to by the parties, to discuss matters relating to this MOU, including:
  - a. Critically evaluating and discussing the effectiveness of the cooperation of the parties pursuant to this MOU and identify areas for improvement;
  - b. Reviewing and confirming the accuracy of the information contained on the educational materials developed by Always & Furever and printed by the City pursuant to this MOU; and
  - c. Discussing any other matters of importance to the parties.
5. **Termination.** Either party to the MOU may terminate it upon 30 days' prior written notice without necessity of demonstrating cause; provided, however, that either party may terminate this MOU immediately upon written notice to the other party in the event that such action is necessary for significant health or safety issues or to comply with applicable law.
6. **Modification.** This MOU may be modified only in a writing signed by both parties. The parties shall endeavor to examine this MOU biennially, to ensure compatibility and effectiveness with any changes in laws, policies, or circumstances.
7. **Severability.** If any provision of this MOU is held by a court of competent jurisdiction to be illegal or unenforceable, the remaining provisions of this MOU shall not be affected and shall be read as if the MOU did not contain the

particular provision held to be invalid, unless to do so would contravene the present valid and legal intent of the parties.

8. **No Third-Party Beneficiary.** This MOU is not intended to benefit any third party, nor shall any person who is not now or in the future a party hereto be entitled to enforce any of the rights or obligations of a party under this MOU.
9. **Applicable Law.** This MOU shall be governed and interpreted in accordance with the laws of the State of Kansas.

**IN WITNESS WHEREOF**, the undersigned hereto have executed this MOU this \_\_\_ day of \_\_\_\_\_, 2020.

THE CITY OF OSAWATOMIE

ALWAYS & FUREVER! ANIMAL  
SANCTUARY

\_\_\_\_\_

\_\_\_\_\_

City Manager

**Subject:** Trap Neuter Release Info

This is a pretty well written article discussing some of the issues with a TNR program that was presented to us at the last council meeting.

Thanks,  
Kirk Wright

There are millions of homeless cats in the United States. Addressing this crisis can be overwhelming, and is a difficult and emotional issue for many people. Some groups and individuals advocate so-called “trap, neuter, release” programs, in which cats (who are often quite tame, as opposed to being truly feral or unsocialized) are sterilized and then abandoned outdoors instead of being admitted to animal shelters. But PETA’s experiences—which include countless incidents in which cats experienced prolonged suffering and died in agony because they were forced to fend for themselves outdoors, whether “managed” or not—have led us to question whether these programs are truly in the cats’ best interests.

Homeless cats do not die of old age. Highly contagious diseases are common, as are infected puncture wounds, broken bones, urinary tract infections, internal injuries, attacks by other animals or cruel humans, automobile accidents, and weather extremes or other terrible living conditions, having to scrounge for food, and being considered a “nuisance,” through no fault of their own. Moreover, free-roaming cats—no matter how well-fed they are—terrorize and kill billions of birds and small native mammals in the U.S. every year, animals who are not equipped to deal with these non-native predators.

Having witnessed firsthand the many gruesome fates of homeless cats and of the animals they prey upon, PETA believes the ideal solution lies in preventing cat homelessness in the first place, by passing and enforcing strong responsible guardianship laws, including requirements that cats (and dogs!) be spayed and neutered, licensed and microchipped, and kept indoors or safely contained on their guardian’s property. Homeless cats need—and deserve—to be brought indoors or taken to open-admission animal shelters where they are safe and warm, and have a chance at being adopted into loving homes.

Each situation is different, but it’s never acceptable to feed cats without providing them with medical care, vaccinations, and sterilization surgeries **at the minimum**. Feeding alone only serves to keep cats in a dangerous situation while also perpetuating the overpopulation crisis and its tragic consequences: the needless suffering and premature deaths of millions of animals every year.

If you’ve determined that you have the time and resources to properly care for a colony of unsocialized (feral) cats, and if the cats are in a safe place (i.e., the climate is temperate and they can be safely contained in a securely enclosed area), please be sure to follow the following minimum guidelines.

### Caring for a Feral Cat Colony

The responsibilities of a feral cat caregiver include ensuring that all cats are safely contained on a property where they are welcome, preferably your own. Before caring for cats on someone else’s property, it’s important

to get written permission to do so, and have a plan in place for what to do if the property is sold to someone who doesn't want the cats there or the property owner has a change of heart.

All cats must be humanely captured, sterilized, thoroughly vaccinated, provided with fresh water and food in a sanitary feeding station, given access to shelter, provided with litterboxes (one per cat) that are cleaned twice per day, and treated for illnesses and injuries. A properly managed feral cat colony doesn't exceed the number of animals legally allowed at any one residence in the jurisdiction in which it is located, is no larger than the caregiver(s) can care for, and is healthy and stable, i.e., no new kittens are born. Only truly feral cats should be added to colonies—tame cats should be cared for indoors, rehomed, or taken to shelters where they have a chance at being reunited with their guardians or adopted into loving indoor-only homes.

- **Health**

Find a veterinarian who can be somewhat flexible—feral cats don't always keep their appointments! Consider the costs of each new cat's needs: spaying/neutering, a full exam, ear and dental cleaning, deworming, feline leukemia and feline AIDS testing, and vaccinations, and the ongoing costs of regular veterinary check-ups, dentals, vaccinations, deworming, and monthly oral flea control (**make sure to use only medicines that clearly state that they are for oral administration**), and more.

Cats who test positive for leukemia (FeLV) or AIDS (FIV) must be isolated from non-positive cats, or euthanized to prevent them from infecting others. If you decide to keep them in isolation, keep in mind that they require close monitoring and considerable financial resources: These infections can cause a progressive deterioration in a cat's health. Painful symptoms often include loss of appetite, progressive weight loss, persistent fever, gum and mouth infections, bladder, skin, and upper respiratory infections, persistent diarrhea, seizures and other neurological disorders, and variety of eye conditions. A study found that nearly a quarter of feral cats in one community were positive for one or both of these deadly infections.

Plan your budget depending on the age, health, and number of cats in the colony. Make sure that you can cover daily and routine expenses in addition to unexpected costs for taking care of injuries and illnesses. Local animal shelters and spay/neuter clinics may be able to help with low-cost surgeries and box trap rentals.

If you notice any cats whose behavior or eating habits have changed, who are lethargic, or who have dull eyes, a dull and/or matted coat, or discharge from the nose or eyes—all possible indicators of ill health—retrap them and take them to your vet. It may help to work out a plan in advance so that your vet can provide you with medications for minor health problems.

Stay organized! Maintain veterinary records on and take a photo of each cat, keep track of any problems that they have had, and maintain a list of those who still require sterilization. Ear-tipping (the removal of a quarter-inch off the top of the left ear conducted by a veterinarian during sterilization surgery) will enable you to identify those who have been sterilized. All cats should be microchipped to ensure proper identification in the event of a health crisis or other emergency.

**With unsocialized domestic animals depending on you for their every need and safety, it's critical that you have a plan in place for ensuring the cats' safety in the event of a natural disaster, or in case something happens to you, the person they depend on. This is another reason why keeping all cats in an enclosed area is so important.**

**Who We Are.** Always & Forever is a 501(c)3 non-profit in Spring Hill, KS dedicated to saving the lives of the unwanted, forgotten, and abandoned dogs and cats.

**What are we asking?** We are asking the City of Osawatomie to approve an ordinance change to allow Always & Forever to implement a Trap-Neuter-Return Program or TNR for short.

**What is TNR?** TNR is the humane approach to controlling feral cat overpopulation. It's a community-based program that we are proposing for Osawatomie to change its ordinance to allow concerned citizens to trap free-roaming cats, bring them to a clinic to get them spayed or neutered, and then return the cats to the exact location where they are trapped so they can live out the rest of their natural lives. There is a large population of homeless stray and feral cats. Given their strong survival capabilities and prolific breeding, if nothing is done, this population will simply continue to grow. If the population is left unchecked, it will only lead to more and more cats living in unmanaged colonies, a decrease in public tolerance of homeless cats, and increased pressure on the environment, animal control agencies and our society as a whole. Currently the cats that are taken in by the police or animal control are brought to the pound and when the pound is full they are euthanized.

**What is the Current Program?** The current approach to controlling/capturing feral cats and turning them in to the pound where they will be killed, may temporarily reduce their numbers, but this doesn't solve the problem. Trap and Remove (and Euthanize) doesn't work. Cats are living there in the environment because of two main reasons: 1) there is a food source (intended or not) and 2) there is some sort of shelter. When cats are removed from a location, it creates a "vacuum" effect — meaning the surrounding cats can sense it and they breed rapidly to fill in the gap, plus new cats move in to take advantage of the natural food and shelter sources. This vacuum effect is well documented. Trapping and removing cats often results in having even more unsterilized cats in the location than when you started. Catch and kill is very costly, doesn't work, and ultimately it's inhumane.

**Do you REALLY have a cat problem?** While you may not see them at your house, think about the reproduction rate of unaltered felines. Math experts calculate that one female cat and her offspring will produce 100 cats in seven years, assuming that all adult cats remain alive for all seven years.<sup>1</sup> The average number of litters a fertile cat produces is 1 to 2 a year with the average litter being from 4 to 6 kittens.

Year	# Cats In the Pound	If Not Fixed / 1 Year (assuming 2 litters – 5 kittens)	If Not Fixed / 2 Years (assuming 5 kittens)
-	Example 1 Cat	11 cats (1+1*2*5)	121 cats
2011	46	506 cats	5,566 cats
2012	70	770 cats	8,470 cats
2013	83	913 cats	10,043 cats
2014	69	759 cats	8,349 cats

<sup>1</sup> <https://www.bjbangs.net/2018/04/25/how-many-cats-can-come-about-from-one-cat-take-pause-before-throwing-out-the-numbers/>

2015	57	627 cats	6,897 cats
2016	43	473 cats	5,203 cats
2017	25	275 cats	3,025 cats
2018	38	418 cats	4,598 cats
2019	42	462 cats	5,082 cats

*Note: These numbers do NOT reflect the cat population in Osawatomie. This solely notes the number of cats the police brought in. Imagine the numbers of the cats left outside unaltered. This is merely to show an example of their reproduction rate if trapped and released without altering.*

**What are we proposing and why?** Trap-Neuter-Return is a proven and humane solution! TNR programs succeed in this case at **NO COST** to the city because Always & Forever will fund the vetting and trapping as well as do all of the work and provides the best possible life for the cats themselves. **Always & Forever will devote all of its resources – financial, personnel and material – toward decreasing the number of homeless cats in your community by paying for the sterilization services for feral cats.** Cat colonies can quickly quadruple in size in a very short period of time, as cats can have two to three litters per year of five to six kittens each. And then those kittens can become pregnant at about six months of age...and so the cycle continues. Spaying and neutering the cats will not only stop the breeding cycle, but it will also eliminate problematic behaviors such as howling, fighting and spraying.

**TNR is effective because:**

- Halt reproduction of existing cats through sterilization, leading to long-term management, reduction and eventual elimination of outdoor cat populations
- Vaccinate cats against rabies (and other diseases, depending on available resources), addressing public health and safety risks
- Decrease nuisance complaints by eliminating or dramatically reducing noise from cat fighting and mating and odor from unneutered male cats spraying urine to mark their territory
- Ease the burden on community resources such as the pound being flooded with cats and their offspring
- Bring new volunteer workforces into the community
- May in some instances create an immediate reduction in cats due to: Kittens young enough to be socialized can be routed into adoption channels, depending on available shelter or rescue resources
  - Friendly adult cats being evaluated for potential reunification with lost owners, transition into home of caretakers, or rehoming through rescue and shelter channels depending on situation and resources and the input of caretakers and feeders bonded with the cats
    - Both of these options are recommended and we would work to implement only if a live outcome for the cats is likely. If that is not the case we recommend sterilization, vaccination, and return to territory for all cats.
- Can improve community and neighborhood relations and lead to new collaborations
- Maintain the health of colony cats (cats living together in a given territory) and allow caretakers to trap new cats who join the colony for TNR or other live-outcome options

### **Is there any Potential Liability to Osawatomie?**

A municipality would be liable for an injury or damage only if it committed an act of negligence. Implementing or permitting a TNR program to reduce the community cat population and resolve nuisance complaints is reasonable government behavior, not negligent conduct. In addition, liability for harm caused by animals typically stems from ownership— but no one “owns” a community cat just as no one “owns” a squirrel who might cause damage. Even if a person is bitten or scratched, a TNRed cat likely would have been vaccinated against rabies. Rabies prophylaxis treatment will likely still be advisable, but the real risk of rabies is reduced. Consider an alternate situation, where a person is bitten and sues the municipality because officials turned down a TNR program that would have dealt with an overpopulation issue and vaccinated cats against the disease. At least 34 states require rabies vaccination for cats, and efforts should be made to revaccinate cats when possible<sup>2</sup>.

**Conclusion... do all lives really matter?** Osawatomie has a choice, to work to manage the cat population that is already there or ignore it. Well-designed and well-implemented programs that focus on non-lethal control and involve all community stakeholders are in line with public opinion. Always & Forever is committed to mobilize an army of compassionate, dedicated people who care about the cats, wildlife, and their communities; however, we can only do this by working with the city to allow the trapping and return and implementation of the program. The implementation and logistics of how the program will work will rely heavily upon proven success at Prairie Paws and other programs. Doing nothing will result in not only the continued increase in the cat population but also the increase in deaths of feral cats.

## RECORD OF SUCCESS:

- An 85% reduction in population over 11 years. Before implementing a TNR program on the University of Central Florida campus, periodic trap and removal efforts tried to keep the population at bay when it increased to nuisance levels. This 11-year study followed a population of 155 free-roaming campus cats from 1991, when the TNR program began, to 2002. No kittens were observed on site after 1995. Additional stray or abandoned cats arrived, but they were neutered and adopted before they could reproduce. The campus cat population decreased by 85% to 23 cats in 2002, demonstrating that a long-term program of neutering plus adoption or a return to the resident colony can reduce free-roaming cat populations in urban areas<sup>3</sup>.
- A city-wide TNR program decreased colony sizes in Rome, Italy by 21%, despite cat immigration (abandonment and spontaneous arrival)<sup>4</sup>
- After implementing TNR at The Fairfax County Animal Shelter in Virginia, the shelter noted a significant decrease in the number of feline offspring entering the shelter's foster care program. The shelter saw a 58% decrease in the number of feral offspring in the shelter's foster care program in 2011 versus in 2010. In addition, foster data from 2008 through 2011 showed a 41% decrease in the number of bottle-fed kittens entering the shelter and a 9% decrease in the total number of kittens needing foster care when comparing 2010 to 2011<sup>5</sup>.
- Arlington, Texas had a 48% decrease in cat intake at the Arlington Animal Shelter after implementing a TNR program<sup>6</sup>
- In Alachua County, Florida a TNR program led to a 70% decline in animal control cat intake in the targeted area and a 13% decline in other areas. Further, per capita shelter intake was 3.5 times higher and per capita shelter euthanasia was 17.5 times higher in the non-target area compared to the TNR target area<sup>7</sup>
- A TNR and spay/neuter voucher program resulted in a 50% increase in animals saved and a 50% decline in animals euthanized in Aiken County, South Carolina<sup>8</sup>.
- In an 8 year period of implementing TNR, San Jose county shelter reduced its cat euthanasia rate from 66.6% down to 34.9%<sup>9</sup>
- TNR proms are cost-effective. For many years, Texas A&M University attempted to control its campus cat population with a trap and- euthanize approach. Two years after a trap test-

vaccinate-alter-return-monitor (TTVARM) program was implemented on campus, there was a 36% reduction in the number of cats and fewer nuisance complaints to the university's pest control service. The authors also note that although the initial costs of starting up TTVARM programs can be substantial in terms of time and money, these costs tend to decrease with time as fewer new cats need to be caught<sup>10</sup>.

- Trap-and-remove efforts can have the opposite effect To determine the population impact of trap and remove (culling) efforts on two open population sites in Tasmania, researchers used wildlife cameras and cat counts to track the number of cats at each site. Despite culling efforts, researchers found large increases in cat numbers: one site had a 75% increase, while another had a staggering 211% increase. Researchers suspect that the populations increased because new cats moved into the sites to take advantage of resources that became available when previously dominant cats were removed. Another explanation could be that kittens born to the unsterilized remaining cats had a better survival rate thanks to more readily available resources (Lazenby et al., 2014)<sup>11</sup>.
- Neutered free-roaming males exhibit less aggression This study compared four free-roaming cat colonies in urban Israel: two that were managed by TNR and two that were not managed at all. Less aggression was observed in the neutered groups, specifically between males, which resulted in reduced fighting and vocalizations. The study concludes that TNR reduced the noise associated with mating and fighting and could lead to fewer nuisance complaints<sup>12</sup>.
- Reduced nuisance behaviors in reality and perception Researchers at a federal facility and hospital in Louisiana studied 41 cats in a TNR program. Three years later, 30 of the original cats remained. Their overall health had improved and nighttime vocalizations were greatly reduced, and no new litters of kittens were found. Although cats were seen as a nuisance prior to the program, human attitudes changed by the end of the three-year period<sup>13</sup>.
- Dramatically reduced shelter intake, impound and euthanasia numbers This study examined the impact of a municipal shelter's Return to Field program in San Jose, California. These programs are shelter-based and include sterilizing, vaccinating, ear tipping and returning healthy, impounded community cats to the place they were found, with or without an identified caregiver. Over four years, the shelter's program garnered decreases in cat intakes (from 70% to 23%), cat and kitten impounds (by 29.1%) and euthanasia for Upper Respiratory Disease (by 99%)<sup>14</sup>.
- Including vaccinations in TNR programs can protect feral cats for many years A TNR program for feral cats in Florida included vaccinations at the time of sterilization. Researchers were able to compare a cat's antibody titers (a measurement that indicates the strength of the body's immune response to a given disease) before the vaccinations and then 10 weeks postvaccination. Many cats had an excellent immune response, indicated by the increase in protective antibody

<sup>14</sup> Johnson, K.L. and Cicirelli, J. (2014). Study of the effect on shelter cat intakes and euthanasia from a shelter neuter return project of 10,080 cats from March 2010 to June 2014. *PeerJ*, 2:e646, <http://dx.doi.org/10.7717/peerj.646>.

titers post-vaccination: panleukopenia (90%), herpes (56%), calicivirus (93%) and rabies (98%). Other studies have shown that postvaccination immunity persists for a minimum of three to seven years in most cats, which means that many feral cats are protected for much of their remaining lifespan. The authors conclude that TNR programs that include vaccinations are likely to protect individual cats and possibly reduce diseases in feral cats in general (Fischer et al., 2007)<sup>15</sup>.

- Unowned free-roaming cats don't have higher FeLV infection rates than owned cats In this study, 1,876 unowned free-roaming cats who were treated in TNR programs in North Carolina and Florida were tested for FeLV infection and FIV antibodies. The results indicate that the prevalence of FeLV infection and FIV antibodies in unowned free-roaming cats are similar to infection rates reported for owned cats<sup>16</sup>.
- The secondary effects of neutering can improve community cat welfare Body condition scores can help evaluate a cat's overall healthy and welfare. This study analyzed the body condition of 105 adult feral cats at the time of neutering and found that they were lean (but not emaciated). Fourteen of the original cats were trapped one year later and showed significant increases in weight and improvements in body condition similar to those of confined pet cats. Caretakers also noted that neutered cats roamed less. The researchers conclude that in addition to halting reproduction, neutering may have other effects that improve the welfare of community cats (Scott et al., 2002)<sup>17</sup>.
- Despite popular belief, toxoplasmosis is not definitively associated with exposure to cats According to the authors, the transmission of toxoplasmosis from cats to people rarely occurs from direct contact. They state that people most commonly acquire toxoplasmosis by eating the cyst form of toxoplasmosis in undercooked meat. A case study of toxoplasmosis in pregnant women did not show a significant association with having an adult cat or kitten at home, cleaning the litter box or having a cat who actively hunts. The authors also cite a study of HIV-infected adults that did not show any association of toxoplasmosis with cat ownership or exposure<sup>18</sup>.
