New Vehicles

NEW ADDITIONS TO OSAWATOMIE POLICE DEPARTMENT FLEET

The Need

The City of Osawatomie has been plagued with dated, failing vehicles -- many lacking modern standard safety features. In addition, older vehicles are more prone to need extensive or frequent maintenance and lack fuel efficiency. In short, having an older fleet puts our employees' safety at risk and costs more money to maintain.

The Solution

In 2022, the City of Osawatomie entered into a partnership with Enterprise Fleet Management Systems to lease new vehicles into the City's aging 28-vehicle fleet. This lease program ensures we have continued access to safe, reliable vehicles and is estimated to reduce maintenance costs by 64% over the next five years. By leasing newer, more fuel efficient vehicles we also estimate that we can save over 20% on fuel costs over the next five years. (Resolution #1020)

What's Coming Next

The City of Osawatomie Police Department is celebrating the arrival of six (6) 2023 Chevy Traverse Special Service Vehicles (SSV) that are specially designed for use within municipal police departments. The Police Department will also soon be welcoming the addition of six (6) 2023 Ford F-150 patrol-ready trucks. Other vehicles for Public Works and Utility Departments are scheduled for delivery in 2023 and 2024.

Total Savings

Estimated Total Savings of
more than \$257,000 over
a 10-year period!
