

MAIN STREET *Plaza*

TRANSITIONING FROM VACANCY TO VITALITY

The Beginning

These two vacant lots were purchased by the City in December 2020 as part of our downtown redevelopment planning. Reimagining the lots was included as part of the first round of Planning Sustainable Places (PSP) planning in 2021, and renderings based on community input were included in the final recommendations presented to the City Council in October 2021.

The Transition

In 2022, as the City applied and prepared for a second round of PSP activities, an investment in the properties was planned to help illustrate what the final space could include and prepare the property for future development. In March of 2023, the City was awarded \$10,000 from the Hawkins Foundation and received \$10,000 from Greater Osawatomie to accomplish this transitional plan. (Resolution #1030 and #1103)

To What End?

Main Street Plaza (a temporary name) will eventually reach its final form of development after the latest PSP planning work is completed by the community. The recommendations and desires of the public will work to shape the ultimate look and function of the space.
