

CONCRETE BEGINS ON 6TH

It's a beautiful thing -- concrete installation is underway at the southern end of 6th Street! This total reconstruction project includes major changes to stormwater systems, drainage, elevation, pedestrian access, and so much more. The final plan improves safety for all forms of traffic and creates a more efficient corridor for all users -- residents, businesses, and visitors!

Improvements will also include aesthetic upgrades to the corridor like removing several overhead utility lines, replacing street lights with decorative poles like the ones on Main Street, and creating some additional greenspaces along the length of the street.

Multi-use pathways in the plan are designed to accommodate people from all walks of life and abilities, including motorized wheelchairs, strollers, bicycles, and other modes of active transportation.

TEMP WATER SHUT-OFFS

Additional temporary water shut-offs are planned for Monday, April 22nd, 2024, weather permitting, as contractor I-Solutions begins an additional segment of water main tie-ins near 6th and Carr Avenue. These tie-ins connect neighborhood water service lines to the newly replaced and relocated water main along 6th Street. Crews will begin the tie-in work at approximately 12:00pm, and it's anticipated that this shut-off will last three (3) to four (4) hours. Impacted areas will have no water or low water pressure while work is being performed.
